## Custom Loader Wing Systems

- ⇒ *Great visibility*
- ⇒ *Highly maneuverable*
- ⇒ *Quick detach for all components*
- ⇒ *Standard plows and wings*
- ⇒ *Cover more area in less time*
- ⇒ *Add versatility to your fleet*

*Bring your loader into the 21st century with a custom built loader mount plow and wing assembly from "The Municipal Specialists". Developed with over 20 years of real time in New England winters, our hi-lift and low-mount patrol wing assemblies can get the job done. Manufactured with the same essential components that have made Frink truck mounted units so successful over the years, the loader mounts allow for full articulation, full lifting and leveling of loader arms and*

*normal range of loader movement - you can simply move more snow, in less time. Add to that the ability to interchange with all of the standard plows and wings in your truck fleet, and you truly have a versatile addition to your winter snow removal fleet. Compatible with all of today's major Loader manufacturers, put your summer machine into winter operations, today!*

*Developed in snow country, for snow country, by the snow country experts*
