

TRAXX™ RC28™

BI-DIRECTIONAL CUTTING

Bi-directional cutting reduces the need for turning, dramatically improving productivity, and minimizes surface disturbance.

PERFORMANCE

Featuring a new and powerful 28 HP vanguard gas engine, with low fuel consumption and emissions, combined with a hybrid electric drive delivers a smooth operation.

STABILITY

The chassis design provides a low center of gravity and perfect 50/50 weight distribution for maximum stability and maneuverability in challenging terrain.

PRECISE CONTROL

Dual joystick control with a working range of 500 ft, specifically designed for the TRAXX™RC28.

ROTARY MULCHING DECK

The TRAXX™RC28 features a specially designed 3.6 ft. rotary mulching deck that is capable of producing a quality cut and attractive finish in fine turf applications such as parks and gardens, and tough enough to be used for extensive mowing of heavy grass.

AUTOSTEER TECHNOLOGY

Optional GPS Autosteer technology from Trimble allows it to automatically steer to within 1 in. accuracy along its cutting route for huge advances in output and efficiency.

Engine

Make	Vanguard 810cc Electronic Fuel Injection (EFI) engine
Horsepower	28hp (21kw)
Fuel	Gas
Fuel tank capacity	2 x 2.6 Gallon, removable tanks
Speed	0-4.3 mph
Compliance	ANSI B71.4 safety regulation

Remote Controls

Working range	500 ft
Frequency	458Mhz
Battery	2 x rechargeable batteries
Proportional joysticks	Standard

Tracks

Universal rubber	Standard – max working angle 55°
------------------	----------------------------------

Mulching Deck

Cutting width	3.6 ft
Cutting height	1.18 in - 7.08 in
Programmable low height setting	Standard
Bi-directional cutting	Standard
Updraft, mulching blades	Standard
Fast-stop rotors	Standard (3 second)

Dimensions

Overall width	59 in
Overall length (without attachment)	59 in
Overall height	30 in - 36 in

Weight

TRAXX™RC28	1060 lb
