Up to 15' hydraulic outreach

7 cubic yard stainless body with payload up to 20,000 lb.

Bucket easily handles heavy debris, squeezes out water simultaneously

Single axle mobility

High production cleaning

Year-round performance

Stetco Provides Stormwater Professionals A Uniquely Complementary Alternative To Vac-Trucks.

Your fleet is incomplete without a Stetco! For over 50 years, shrewd Municipal professionals have depended on Stetco's powerful hydraulic clamshell buckets to quickly and economically clean stormwater infrastructure. As a stand-alone solution or to assist vac-trucks with the "heavy lifting", Stetco equipment will reduce EPA compliance costs and increase your preparedness.

STETCO benefits include:

- Substantially lower cost of ownership
- High uptime, low maintenance
- Pragmatic, no-nonsense design and simple operation
- Buckets squeeze out liquids and load solid debris, not slurry
- No need to carry and discharge water
- Single axle chassis for ease of handling, non-CDL options available
- Quiet operation at low engine RPM
- Easily handles heavy, cumbersome debris that vac-trucks cannot
- Wide range of buckets to fit most structures
- Relieves wear & tear burden on vac-trucks

**SIMPLE, EFFECTIVE,
ECONOMICAL**
