

“OWSK” ONE-WAY PLOW SERIES

“QUALITY by DESIGN”

Everest OWSK One-Way Snow Plow

Our OWSK boasts a high strength low weight design.

The push frame is comprised of a heavy duty tubular sector, lift chains, adjustable cast frame shoes, and compression trip spring assemblies.

A 31” spacing oscillator bar comes standard which adjusts plow articulation to road contour.

The moldboard strut increases overall strength.

Models offered include standard intake and discharge heights, high intake and discharge heights, heavy-duty skin, stainless steel skin, polymer overlay, and 11’ and 12’ lengths.

At a 35” angle, the OWSK produces a 9’ cleared path for 11’ models and a 10’ cleared path for 12’ models.
