The Wave[®] and Vertex[®] are dual threats with their patented dual-wall polished extrusions made of strong, long-lasting aluminum. Their walls are surprisingly thin without compromising on toughness. The polished outer walls give the bodies a distinctive look, while sturdy inner walls and stiffeners hide dents and dings. The Wave[®] and Vertex[®] feature aerodynamic, fuel-saving sides; rubber seal tailgates; and patented SST-shaped crossmembers for optimal performance in the field.
